Tableau II - Les haies mésophiles à caractère thermophile.

Planche n°1 : répartition de six espèces, en Limousin et sur ses bordures occidentales.

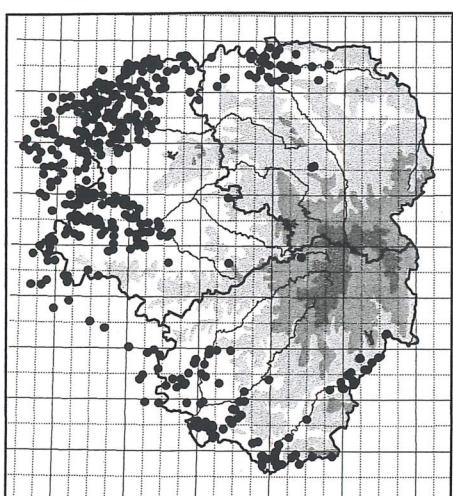

Sorbus torminalis

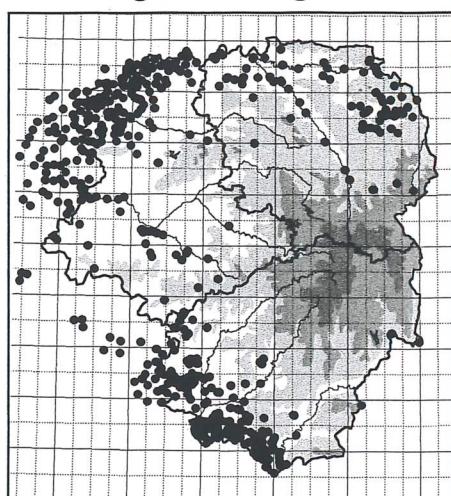

Acer campestre

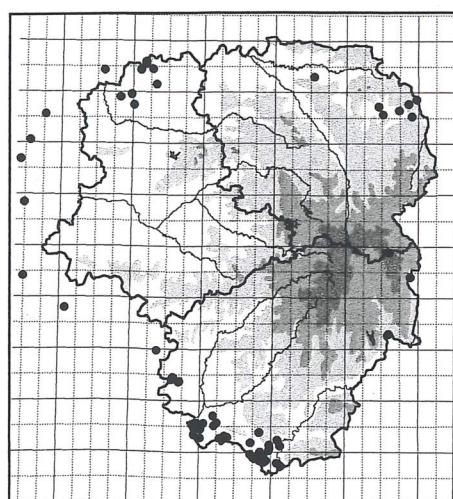

Ruscus aculeatus

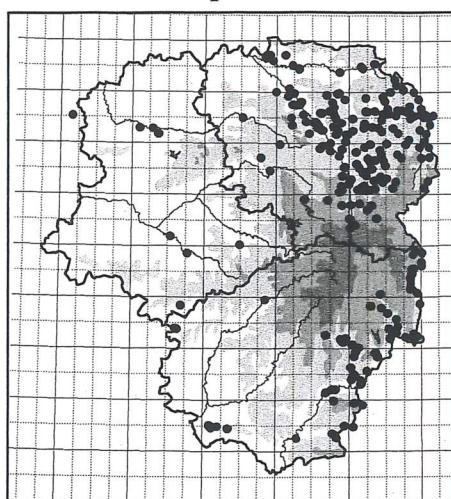

Ligustrum vulgare

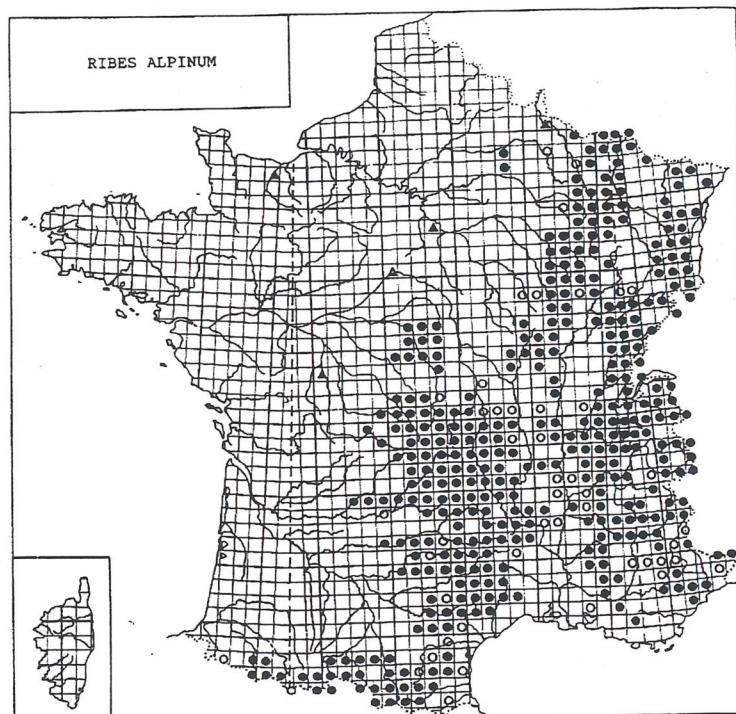

Rhamnus catharticus

Ribes alpinum

D'après la banque de données (Fnat2000) créée pour l'ouvrage : *Plantes et Végétation en Limousin, Atlas de la Flore Vasculaire*, E.N.L. 2001 et des données complémentaires de A. Vilks.

Carte n°3 : répartition en France de *Ribes alpinum*.

D'après Pierre DUPONT, 1990 – *Atlas partiel de la Flore de France*, Paris, Muséum National d'Histoire Naturelle.

Tableau III - Les haies mésophiles à *Ribes alpinum*.
