BIATSS

Library staff, engineers, administrative staff, technical staff, social workers and healthcare staff: they provide support and assistance for research, teaching and management activities within the institutions.

R1 – Early-career researcher

A researcher at the early stage of their academic career: this category includes, in particular, PhD students as well as certain research engineers and technicians who are directly involved in academic activities.

R2 – Established Researcher

A researcher who has already demonstrated their ability to carry out research independently: this category includes, in particular, postdoctoral researchers and temporary teaching and research assistants (ATERs).

R3 – Senior Researcher

A researcher with significant experience who is recognised within their scientific field: this category includes, in particular, senior lecturers, research fellows and junior professors.

R4 – Principal Researcher / Lead Researcher

A researcher exercising a scientific leadership role at national or international level: this category includes, in particular, university professors, research directors and other high-level scientific leaders.

Émeritus

A retired lecturer-researcher or researcher who has been awarded the title of emeritus: this title enables them to continue certain research, supervisory or scientific dissemination activities after retirement.

Affiliated

Staff carrying out research within the institution or unit without being directly employed by it: they may be affiliated with another organisation, another university or an institutional partner.

Research institute

A federative structure bringing together several research units around a common scientific field: the research institutes at the University of Limoges promote scientific coordination, national and international visibility, and the development of interdisciplinary projects.

Research unit

An operational structure within which research is carried out: it brings together researchers, academic staff, PhD students and support staff around a shared scientific project.

Research platform

A shared infrastructure providing specialised equipment, expertise or services to support research activities. It may be used by several units, institutes or external partners.

Platforms

Health

An integrated approach
for the benefit of health

criBL
Lymphoproliferative
disorders

RESINFIT
Molecular mechanisms
of resistance and
therapeutic innovations

**PHARMACOLOGY &
TRANSPLANTATION**
Molecular pharmacology
and transplantation

IESM
Institute of Epidemiology
and Public Health

LABCiS
Laboratory for Agrosources,
Biomolecules and Chemistry
for Health Innovation

VieSanté
Ageing, Fragility,
Prevention, E-health

NeurIT
Peripheral Neuropathies and
Therapeutic Innovations

CAPTuR
Control of Cellular Activation,
Tumor Progression and
Therapeutic Resistance

HAAVE
Disability, Activity, Ageing,
Autonomy, Environment

GIO

Governance of Institutions
and Organisations

OMIJ

Observatory of
Institutional Mutations
and Legal Issues

CREOP

Research Centre
on the Enterprise,
Organisations
and Heritage

LAPE

Laboratory for Economic
Analysis and Foresight

SHS

Human and
Social Sciences

CRIHAM
Research Centre
for Interdisciplinary Studies
in History, Art History
and Musicology

GEOLAB
Laboratory of Geography,
Physical and Environmental
Sciences

EHIC
Human Spaces and
Cultural Interactions

FrED
Education and Diversity
in French-Speaking Regions

CeReS
Research Centre
on Semiotics

GRESKO
Research Group
in Sociology

IMPEO

Materials, Processes,
Environment, Structures

IRCER
Research Institute
on Ceramics

GC2D
Civil Engineering and
Sustainability of Constructions

E2LIM
Water & Environment
